MOLECULAR PHYSICS

VOLUME 10

Printed and Published by

TAYLOR & FRANCIS LTD

RED LION COURT, FLEET STREET, LONDON, E.C.4

CONTENTS OF VOLUME 10

NUMBER 1

	Page
Spin-rotation interaction constants for bent AH_2 molecules in doublet electronic states. R. N. DIXON	1
The nephelauxetic effect in rare earth complexes illustrated for praseodymium (III). S. P. SINHA and H.-H. SCHMIDTKE	7
Electron momentum distributions in organic liquids. D. P. KERR, S. Y. CHUANG and B. G. HOGG	13
Solvent effects in proton and ^{13}C N.M.R. chemical shifts of polar compounds. J. K. BECCONSALL and P. HAMPSON	21
An electron spin resonance study of a free radical reaction in crystals of sodium formate. R. E. BELLIS and S. CLOUGH	33
Assignment of the proton magnetic resonance spectra of some tris-(diethylphenylphosphine) complexes of Re(III), Re(IV), Ir(III) and Rh(III). E. W. RANDALL and D. SHAW	41
Strong-coupling perturbation approximation in three-spin N.M.R. systems. E. O. BISHOP	49
Core and repulsion integrals for Löwdin orthogonalized atomic orbitals in pi-electron systems. D. P. CHONG	67
Exact and approximate values for the radial distribution function at low densities for the 6 : 12 potential. DOUGLAS HENDERSON	73

RESEARCH NOTES

Study of the pentalene and heptalene molecules according to the SCF theory (Roothaan method). J. PALOU and H. I. FERNÁNDEZ-ALONSO ..	81
Polycentric $2p\pi$ electron repulsion integrals for the benzene molecule. JIŘÍ ČÍZEK	83
Far infra-red absorption in liquid nitrogen. N. W. B. STONE and DUDLEY WILLIAMS	85
Quantum second virial coefficient of a two-dimensional Lennard-Jones gas. M. L. KLEIN	87
Electron resonance of phosphorescent mesitylene. M. S. DE GROOT, I. A. M. HESSELMANN and J. H. VAN DER WAALS	91
Optical emission of polysiloxanes by electron diamagnetic resonance excitation. FLOYD HUGHES	95

NUMBER 2

The evaluation of the one-centre integrals in the semi-empirical molecular orbital theory. LUIGI OLEARI, LORENZO DI SIPIO and GIANNI DE MICHELIS	97
The spectra and electronic structure of tetrahedral ions. I. Chromate and permanganate ions. LUIGI OLEARI, GIANNI DE MICHELIS and LORENZO DI SIPIO	111
A nuclear magnetic resonance study of mercury dimethyl. K. A. McLAUCHLAN, D. H. WHIFFEN and L. W. REEVES	131
Non-aqueous solutions of electrolytes. I. The ^{75}As nuclear magnetic spin-lattice relaxation times of the hexafluoroarsenate ion. M. ST. J. ARNOLD and K. J. PACKER	141

	Page
Molecular motion in liquid benzene by nuclear magnetic resonance. J. G. POWLES and R. FIGGINS	155
The calculation of rainbow scattering cross sections. R. J. MUNN and FRANCIS J. SMITH	163
An extended Wolfsberg-Helmholz calculation on CuF_6^{-4} . HELGE JOHANSEN and C. J. BALLHAUSEN	175
A MO calculation of the static Jahn-Teller effect in CuF_6^{-4} . C. J. BALLHAUSEN and HELGE JOHANSEN	183
Study of an external spherical reference system for N.M.R. spectroscopy. D. J. FROST and G. E. HALL	191

RESEARCH NOTES

Temperature effects on charge transfer fluorescence spectra and mechanisms of charge transfer interactions in the excited electronic state. NOBORU MATAGA, KIYOSHI EZUMI and TADASHI OKADA	201
Fluorescence of pyrene-N,N-dimethylaniline complex in non-polar solvent. NOBORU MATAGA, TADASHI OKADA and KIYOSHI EZUMI	203
Some comments on the paper entitled "Ligand field parameters of Mo(III) complexes" by C. Furlani and O. Piovesana. R. A. WALTON, W. M. CARMICHAEL and D. A. EDWARDS	205
On hyperfine coupling constants and molecular geometries of radical-anions of some cyclooctatetraene derivatives. JOHN F. GARST	207

NUMBER 3

Vicinal proton coupling constants and the electronegativity of substituents: evidence for an effect alternating with the number of intervening bonds. A. D. COHEN and T. SCHAEFER	209
Effect of stretching on intermolecular potentials of diatomic molecules. ANIL SARAN and S. K. DEB	221
A study of the ω -technique as applied to unsaturated hydrocarbons. G. DOGGETT	225
The calculation of the E.S.R. hyperfine coupling constants of substituent methyl and methylene group protons. DONALD H. LEVY	233
Paramagnetic resonance in phosphorescent aromatic compounds. IV. Ions in orbitally degenerate states. M. S. DE GROOT, I. A. M. HESSELMANN and J. H. VAN DER WAALS	241
Nuclear magnetic resonance of organic free radicals. K. H. HAUSSER, H. BRUNNER and J. C. JOCHIMS	253
Spin densities in some odd alternant radicals including linear polyene radicals. A. T. AMOS and S. G. DAVISON	261
The nitrogen atom orbital populations in the azabenzenes as determined by their ^{14}N nuclear quadrupole coupling constants. L. GUIBÉ and E. A. C. LUCKEN	273
Total collision cross sections between alkali atoms at thermal energies. FRANCIS J. SMITH	283
An application of the Pariser-Parr approximation to the nitrogen molecule. U. ÖPIK and T. HOWARD THOMAS	289

RESEARCH NOTES

Pairwise trapping in γ -irradiated sodium nitroprusside. D. A. C. MCNEIL, J. B. RAYNOR and M. C. R. SYMONS	297
Extended basis set wavefunctions for H_2 using $2p\sigma$ and $3d\sigma$ orbitals. H. C. BOWEN	299

NUMBER 4

A proton magnetic resonance investigation of biphenyl. RALPH E. MAYO and J. H. GOLDSTEIN	301
Zero-field splittings in aromatic triplet states. I. Naphthalene, pyrene and 1,12-benzperylene. COLIN THOMSON	309
The electron spin resonance of irradiated glycine at 77°K. M. A. COLLINS and D. H. WHIFFEN	317
The diamagnetism of 1,8 bisdehydro[14]annulene. N. A. BAILEY, M. GERLOCH and R. MASON	327
Long range three-body forces between helium and hydrogen atoms. A. DALGARNO and G. A. VICTOR	333
Vibrational effects on electron resonance spectra. R. E. MOSS	339
High resolution nuclear magnetic resonance spectra of $AA'A''A'''XX'X''X'''$ systems. Part I. Symmetry properties of $AA'A''A'''XX'X''X'''$ systems. R. G. JONES and S. M. WALKER	349
High resolution nuclear magnetic resonance spectra of $AA'A''A'''XX'X''X'''$ systems. Part II. Application of the principles of sub-spectral analysis. R. G. JONES and S. M. WALKER	363
Statistics and the symmetry groups of non-rigid molecules. D. J. R. LLOYD-EVANS	377
On the question of superconductivity in organic molecules. K. F. G. PAULUS	381
Far infra-red spectra of molecular crystals. V. Sulphur dioxide. A. ANDERSON and S. H. WALMSLEY	391

RESEARCH NOTES

Theory for magneto-optical rotation (MOR) and magnetic circular dichroism (MCD) in planar aromatic molecules. PETER S. PERSHAN, MARTIN GOUTERMAN and ROBERT L. FULTON	397
Dimerization of gaseous nitric oxide. E. A. GUGGENHEIM	401

NUMBER 5

Virial expansion for the radial distribution function of a fluid using the 6 : 12 potential. DOUGLAS HENDERSON and LYNN ODEN	405
Shock compression of liquid hydrogen. M. VAN THIEL and B. J. ALDER	427
N.M.R. spectra of the $X_nAA'X_n'$ type. Part II. The case of small long-range coupling: the spectrum of fluoro-N,N'-dimethyl-1,3,2,4-diazadiphosphetidine. R. K. HARRIS and C. M. WOODMAN	437
Proton spin-lattice relaxation in liquid water and liquid ammonia. D. W. G. SMITH and J. G. POWLES	451
A force field for difluoramine. S. SUNDARAM and Y. ANANTARAMA SARMA and E. A. PIOTROWSKI	465
Spin-spin and spin-lattice relaxation in aromatic fluorine compounds. J. G. KENWORTHY, J. A. LADD and R. E. RICHARDS	469
Note on the N.M.R. spectra of molecules with periodic internal motion. S. SÝKORA	473
On the number of configurations in an N -electron system. J. J. C. MULDER	479
The electronic structure of ionized molecules. IV. Vibrationally induced dissociations. J. C. LORQUET	489

RESEARCH NOTES

The electronic structure of ionized molecules. V. Radiationless transitions. J. C. LORQUET	493
Proton spin-lattice relaxation in solutions of glycogen in water. E. RAGOZZINO	497
The absolute signs of the ^{31}P - ^1H coupling constants in the nuclear magnetic resonance spectra of triethylphosphite, triethylphosphate and triethyl (0, 0, 0) thiophosphate. E. DUVAL and E. A. C. LUCKEN	499

NUMBER 6

Vibronic effects on electron resonance spectra: the alkyl cyclooctatetraene anions. R. E. MOSS	501
A theoretical investigation of the water molecule. DAVID M. BISHOP and MILAN RANDIĆ	517
Positive enhancement of proton resonances by dynamic nuclear polarization. R. A. DWEK, J. G. KENWORTHY and R. E. RICHARDS	529
On the structure of the direct correlation function in the theory of fluids. J. S. ROWLINSON	533
Alternating linewidths. A novel relaxation process in the electron resonance of biradicals. G. R. LUCKHURST	543
Nuclear magnetic resonance studies of alkali metal halide solutions. I. Cation resonances. C. DEVERELL and R. E. RICHARDS	551
Electron spin resonance of an X-ray irradiated single crystal of potassium dihydrogen arsenate, KH_2AsO_4 . MARLENE HAMPTON, F. G. HERRING, W. C. LIN and C. A. McDOWELL	565
The effects of dynamic exchange on the electron resonance line shapes of octahedral copper complexes. A. HUDSON	575
The kinetic theory of transport processes in adsorbed gases. J. POPIELAWSKI	583
Erratum—DALGARNO and VICTOR	600

RESEARCH NOTES

ENDOR transition moments. D. H. WHIFFEN	595
The temperature dependence of the electron resonance spectrum of copper acetylacetonate. H. R. FALLE and G. R. LUCKHURST	597
The electron spin resonance spectrum of the dicyclopropyl ketone radical anion. N. K. RAY, R. K. GUPTA and P. T. NARASIMHAN	601
N.M.R. studies of isotopically substituted molecules: the sign of the $\text{C} \equiv \text{N}$ coupling constant. W. MCFARLANE	603
